Swedish Migration Board publishes forecasting on the number of asylum applications for 2025-2028

The Swedish Migration Board published a new forecast with calculations and assumptions for developments in the area of migration from 2025-2028. During the first semester of 2025, there were 30% fewer asylum applications than in the corresponding period in 2024. This decrease is primarily due to the new statute of limitations rules that came into effect on 1 April 2025.
