Asylum data published

CEAR published the report "More than figures" which analyses the asylum data in 2024. The report highlights that 167,366 people applied for asylum, which represents a slight increase compared to the previous year, despite alarmist forecasts.

In addition, the organisation highlighted the increase in the recognition rate compared to the previous year, from 12 to 18.5%, although it regrets that it is still lower than the European average, which at the end of November was 40%.
