Patvērums starts the project "On the way to belonging!"

The NGO Patvērums started the project "On the way to belonging!". The project will run from March 2 to November 15 and is co-financed by the Riga City Public Integration Programme. It includes Latvian language conversation clubs meeting twice a week during the summer, as well as three integration-focused workshops bringing together migrant, refugee and local women.

These workshops combine emotional and practical activities, including personal development support, shared cooking sessions, and a handicraft. The overall aim is to strengthen language skills, social inclusion, well-being, and interpersonal connections among participants through informal and creative interaction
