The COA announced, around 75% of reception places under the Distribution Act will be available by 1 July 2025

The total number of reception places foreseen under the distribution decisions is 101,500.

From the 75,000 places, 40,000 will be available for a longer period and 35,000 will be emergency places. COA underlined that it would be important to convert emergency places into long-term facilities on a longer term, allowing for more sustainability.
